

Vimar at Fabbrica del Vapore with the Mutanti Exhibition (MDW 2026)

During Milano Design Week 2026, Vimar will be showcased in the Sala Colonne within Fabbrica del Vapore for the exhibition *Mutanti, corpi, menti, materia in trasformazione* (*Mutants: bodies, minds, matter in transformation*), which offers a female-led narrative of design in the era of shared intelligence.

Curated by **Anty Pansera** and promoted by **Insula delle Rose** and **DcomeDesign** (an association which has promoted female creativity for over 15 years), Mutanti utilises a selection of projects, prototypes, and visual and sound narratives by women to illustrate a design world that evolves alongside our global reality.

In this context, Vimar presents its two most iconic series in the realms of architecture and design: Eikon Exé and Linea.

The perfect combination of precision technology and impeccable craftsmanship, available in various materials and prestigious finishes, from stone and metal to glass, **Eikon Exé** is a cover plate with squared and striking silhouettes. Recently honoured with the prestigious **Compasso d'Oro International Award** for its Tondo control, the series offers various control styles (Traditional, **Vintage**, **Flat** and **Tondo**) to provide the electrical system with an unmistakable style.

Distinguished by minimal thickness, **Linea** provides perfect flatness between the cover plate and the controls, gently interrupted by the delicately curved profile of the new aligned button. Once activated, the control resumes its original position, guaranteeing perfect alignment at all times thanks to patented In-line technology.

Awarded an **Honourable Mention at the Compasso d'Oro**, Linea is the result of an extensive research process. Thanks to its **24 patents** and to the use of plastic from **renewable and recycled sources**, it in fact **reduces CO₂ emissions by 80%** each year.

Within the *Mutanti, corpi, menti, materia in trasformazione* (*Mutants: bodies, minds, matter in transformation*), exhibition, Vimar's presence serves as a coherent and powerful synthesis of the narrative: design that evolves, engages with the present and interprets change through research, awareness, and responsibility.

MUTANTI

Corpi, menti, materia in trasformazione (*Mutants: bodies, minds, matter in transformation*).
